

concerning docket n. 04-160, i strongly urge the commission to back local
broadcasters and force satellite radio operators "xm" and "sirius" to abide by
the original ground rules for which their licenses were granted, those being a
"national" radio service. now these two giants with 120 channels each want to
reach into virtually every radio market with local programming. this action
would place an undo hardship on existing local radio radio stations who have to
maintain a local presence in their marketplace. local broadcasters are bound to
provide a community service and here in oklahoma we provided over \$110,000,000
in community service efforts. i urge the commission to support the nab petition
regarding docket no. 04-160 as we do!

thank you,
